PROFESSIONAL SUMMARY

Leads eight backend engineers, combining people management, delivery planning, and hands-on technical direction. Brings 5+ years in backend development across commerce, payments, and real-time systems.

PROFESSIONAL EXPERIENCE

LicenseMarket
Engineering Manager / Backend Engineer | 2023 - Present

- Began team management in early 2024; now manage eight engineers, including hiring, one-to-ones, and performance reviews.
- Coordinate delivery using GitHub Projects, issues, code reviews, and CI/CD.
- Delivered 5+ major releases spanning ticketing, reporting, integrations, document automation, and AI chat.
- Mentor through hands-on project work while contributing to architecture and database design.
- Collaborate with accounting on refunds, wallet transactions, and financial reporting.
- Reduced average API latency by 40%, validated with database/API timing tests over approximately six months.
- Maintained 99.9% platform uptime over approximately six months, tracked with UptimeRobot and CRM incident records.

GBT Market
Backend Engineer (Freelance) | 2025 - Present

- Develop trading, wallet, payment, and reporting services for a live gold and cryptocurrency platform.
- Protect transaction correctness with atomic balance updates, concurrency safeguards, and idempotency.
- Support real-time processing, regression testing, and production releases across NestJS/MongoDB services.

Keyvangold
Backend Engineer (Freelance) | 2025 - Present

- Contribute to production gold-trading APIs for pricing, identity verification, rial and gold wallets, payments, settlement, inventory, and delivery.
- Work on financial ledgers, role-based permissions, audit logs, Excel reports, and Persian invoice PDFs.
- Support database migrations, Docker/Nginx deployments, and production maintenance.

PROFESSIONAL EXPERIENCE - CONTINUED

Mobasher

Backend Engineer (Freelance) | 2023 - 2025

- Developed NestJS microservices for consulting and learning, including messaging and voice/video sessions.
- Supported 500+ concurrent users in production with observed messaging latency of 100-150 ms.
- Integrated WebRTC, Socket.IO, and RabbitMQ communication workflows with an Angular frontend.
- Optimized SQL stored procedures and data retrieval for frequently used screens.

ExModule

Backend Developer | 2022 - 2023

- Built cryptocurrency backend services with NestJS, PostgreSQL, MongoDB, Redis, and Elasticsearch.
- Implemented KYC/AML onboarding, document and banking verification, exchange integrations, commissions, and referrals.

Borhan Sharif

Backend Developer Intern | 2021 - 2022

- Contributed to Symorgh ERP, supporting project workflows, inventory, procurement, invoicing, and payments.
- Worked on a layered C#/ASP.NET Core backend with Entity Framework Core, MySQL, and an Angular frontend.

LEADERSHIP AND TECHNICAL SKILLS

Leadership: Hiring, performance reviews, mentoring, delivery planning, GitHub Projects, technical direction

Backend and data: TypeScript, Node.js, NestJS, PostgreSQL, MongoDB, MySQL, Prisma, Redis

Architecture: Microservices, REST APIs, RabbitMQ, Bull, real-time communication, transaction processing

Production and quality: Kubernetes, Docker, Linux, Nginx, CI/CD, Grafana, Sentry, incident response, automated testing

Security: Authentication, authorization, JWT, data hashing and encryption

EDUCATION AND TRAINING

Payame Noor University | 2021 - Present

B.Sc. Computer Science, in progress

Maktab Sharif | 2021

Node.js Backend Development coursework, 320+ hours
